MBPCloud - My Office in the Cloud

MBPCloud is a cloud-based hub for business or home. With business it allows Small ~ Medium ~ Large businesses to map and manage their operations and administration including: accounting, contracts, invoices, purchase orders, Recruitment, reimbursements, Rosters & Timesheets, Salary Packaging, staff leave, Tasks & Projects, and much more from one common platform.

Add your own Apps and proprietary software. All on one integrated platform.

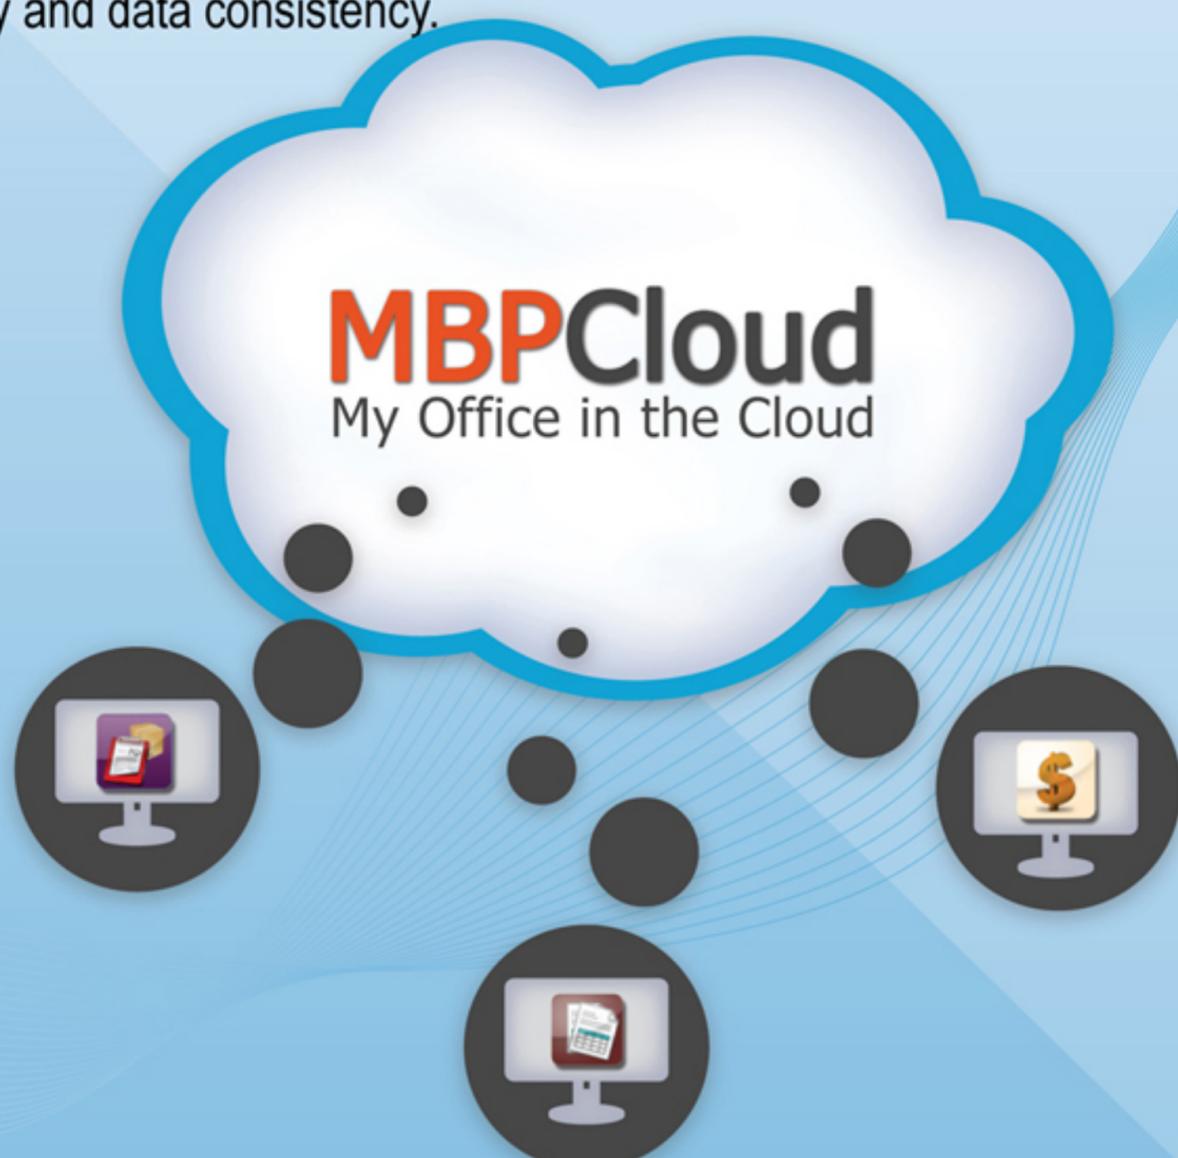

We also design solutions and adaptations of our software unique to your business. You'll have access to real-time data as well as specialists in their respective field 24/7 through our enquiry facility. We are committed to working closely with you, to seamlessly integrate your functions and software within your business, so that you have a more powerful, efficient organisation.

Good Reasons to choose MBPCloud Apps

- Access to enterprise-level apps on a small business budget.
- Low investment – no capital upfront cost ~ pay only for what you use.
- Better network infrastructure, less hardware, no license fees & IT resource staff cost.
- Frequent upgrades given automatically at no additional cost.
- Accessible from anywhere over the internet.
- Quick setup and transition from legacy systems, making it ready for use in minimal time.
- Can be customised to suit your business needs.
- End-to-end operational transparency and data consistency.

- Sales Invoice Manager System
- Roster & Timesheet
- Leave Management System
- PACT Contract System
- Payroll System (coming)
- Salary Packaging System
- Task Management System
- MBPCloud Office and more...

Purchase Order System

MBPCloud Purchase Order is designed to suit any type of business, industry or size - Large, Medium or Small. Purchase Orders (POs) can be easily accessed from anywhere at any time, thereby giving you a real-time status. It improves your business processes by automating the workflow & minimising manual paperwork ~ saving you Time & Cost.

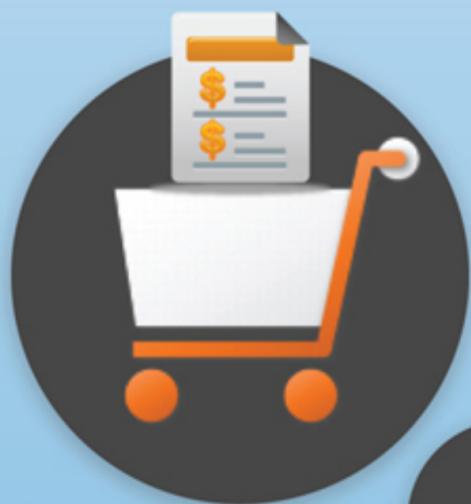

It supports multiple levels of approval across the organization & across borders if required. Track details for every transaction so you can confirm & validate with confidence. MBPCloud automatically generates purchase orders according to your specifications to the correct supplier using the recurrence feature. Process partial receipts, update the respective PO when goods are received and match cost variances between goods received & goods invoiced.

You can use MBPCloud's Purchase Order in tandem with Invoice Management System to track all your generated purchase orders and invoices raised to customers. Comprehensive reports completely analyze these to give you a bird's eye view of finances.

Furthermore, it's compatible with the major online accounting softwares.

Benefits:

- Accommodates multi-level approvals with different approval limits - from two levels to infinity; strengthening your internal control procedure at the same time.
- Considerable reduction in administration overheads.
- Upon electronic acceptance by supplier, PO is automatically saved into MBPCloud's PO system.
- Improve your communication between requester, approver & supplier through automated emails.
- Instant visibility of your cash flow through accurate & timely reports.
- Has been launched internationally and supports multi-currency.

Sales Invoice Manager System

MBPCloud Sales Invoice Manager is an intelligent web based application that automates the way invoices are handled. It eliminates the hassle of dealing with all those different types of invoices you have to send. You can generate and send invoices in seconds without the additional cost of printing & posting by mail. You can quickly create your own business network of Clients by the use of MBPCloud Clients directory to gain further business advantage.

Benefits:

- MBPCloud Sales Invoice Manager understands your business needs – it helps you manage your business in the way you want to work.
- A fully paperless invoicing system supports multi-currency, which allows your business to expand globally.

Roster & Timesheet

MBPCloud Roster & Timesheet suits businesses that track the actual time & cost involved in performing/completing tasks/projects for their Clients & Customers. You can collect data on the actual time spent & the expenses incurred on each Project and Tasks assigned to your staff. This empowers you with additional information on how the project is moving forward, the man hours being spent, bottlenecks in the process & finally to bill the Client & Customer accurately.

It also suits both independent & contractor staff. Timesheets can be submitted for approval to your Client or Customer through email. Timesheets can be tracked and the actual time & cost can be calculated for invoice processing.

You can also export all the timesheets files to your local drive in excel or PDF format.

Benefits:

- Designed to suit both independent & contractor staff
- Contractors can track time spent on multiple projects.

Leave Management System

It is a web-based Leave Management System that allows your HR department to centrally manage the entire staff leave. You can create leave types & holidays based on your leave policy & define business rules for each leave type. Facilitates a fully automated staff leave management process. Staff can use it's 'Leave History' process to view their beginning leave balance, accruals, current balance, break-up of the type of leave taken & their balances etc.

Benefits:

- Automatic email triggers are sent for leave requests, approvals & declines.
- Integrated with the Timesheet & Roster system to provide a total cloud based leave management system for timesheet & attendance tracking.
- Powerful, flexible & user friendly.
- User defined Leave types, Business rules, Holiday lists & Work week setting
- User defined leave workflow & approval hierarchy to suit your business requirements

PACT Contract System

PACT Contract is designed to automate and accelerate a contract's complete lifecycle; from request to approval. PACT can be used to raise contracts such as Business to Business, Internal, Employment, Labour on Hire, etc. It reduces complexity, enhances efficiency and lowers contract administration costs.

Benefits:

- Customise all Terms & Conditions to suit your business needs.
- Create all contracts electronically; Business-to-Business, Employment, ABN, Labour On-Hire and many more.
- Assign your own set of Requesters & Approvers from within your organisation for contract request and approvals.
- Access to a comprehensive list of standard Terms & Conditions available in MBPCloud's Master Library
- Hire permanent or casual Staff, on full or part-time basis.
- Proactive email alerts sent to Requester, Approver, Client, and Staff.
- Track status of your contract requests online.

Testimonials

"MBPcloud has helped in the smooth transition of our office into the cloud and paperless office becoming a reality. Great work!"

-Sydney Basin

"I really want to thank MBPcloud's purchase order system. The system helped us to reduce our costs and helped us making our business grow in the last 2 years."

-Sydney Basin

"We have been using MBPcloud's purchase order system for the past year; we've seen so many benefits and the Administration Department of our office is hassle free now."

EFNL

"We are very pleased with the performance of the Purchase order system from MBPcloud. The systems are complete, great flow and fully operational with no down time."

Shed 5

"That was a quick turnaround. I am very impressed. Thank you for your speed and accuracy."

-Michael Field
